

HIS HANDIWORKS

WORKING TO KEEP YOUR BUSINESS CLEAN AND LOOKING GOOD

CORONAVIRUS AWARENESS

WHAT IS CORONAVIRUS?

COVID-19 is an extremely common virus first reported in China, which causes flu like symptoms and upper respiratory infections.

HOW DOES IT SPREAD?

Similar to the flu, COVID-19 spreads from close contact with droplets from an infected person. Touching individuals, objects, or surfaces that are contaminated, and then touching your eyes, nose, or mouth can cause the spread as well.

RESOURCES!

If you begin to feel symptoms, contact your healthcare provider. Other resources include:

- CDC: <https://www.cdc.gov/>
- TEXAS DEPARTMENT OF STATE HEALTH SERVICES:
<https://dshs.texas.gov/coronavirus/>

His Handiworks will provide the proper disinfectant cleaning for all major viruses as listed by the CDC, which includes the Coronavirus.

SYMPTOMS?

Common symptoms may appear 2-14 after exposure and can cause severe illness or even death. Symptoms include: cough, fever, and shortness of breath.

AM I AT RISK?

The spread of COVID-19 is evolving quickly, which is being monitored by a number of resources. Some people are at higher risk than others, including older adults, and people with serious chronic medical conditions. Those in communities with ongoing spread are at higher risk, as well as travelers, and healthcare providers.

WHAT CAN I DO TO REDUCE MY RISK?

- Avoid contact with sick individuals
- Avoid touching your eyes, nose, and mouth
- Cover your cough or sneeze
- Frequently clean and disinfect objects and surfaces
- WASH YOUR HANDS!
